## What is an arboretum?

A living collection of trees and shrubs cultivated and labeled for scientific and educational purposes. Cheekwood's arboretum is located throughout the historic 55 acres.

## What are the benefits of an arboretum?

- Demonstrates a tree's performance under cultivated conditions
- Educates and provides a resource for the community, showcasing trees that thrive in Middle Tennessee
- Conserves trees like the Stinking Cedar, whose natural habitat is threatened

## Why are trees important?

- Provide shelter for wildlife
- Produce oxygen for us; Trees act as giant filters and clean the air we breathe
- Improve soil conditions and prevent erosion
- Provide shade
- Help to control and absorb noise pollution
- Act as windbreaks
- Add character to the landscape and create beautiful backdrops
- Enhance the value of a property
